Growth Products 15.0.0 SR Mag

All-new Growth Products 15.0.0 SR Mag is a high-quality, conventional fertiliser that utilises the latest mini-granular technology. The homogenous mini prill contains four different nitrogen sources for a uniform nutrient release over 6-10 weeks.

5% Magnesium and 3% Calcium offer excellent plant health and colour without soft, lush growth. Also includes zeolite to aid nutrient retention and availability.

- Mini granules (1 – 2.5mm) break down within a few days, minimising surface disruption and pick-up.
- Nitrogen from Methylene Urea for slow release.
- Also contains N from Ammonia, Nitrate and Urea for consistent, phased release.
- Zero iron formulation.
- Suitable for football/rugby pitches, cricket pitches, golf surrounds, tees and fairways and private lawns.

				Nutrient applied at 35g/m²			Accupro setting for 35g/m²

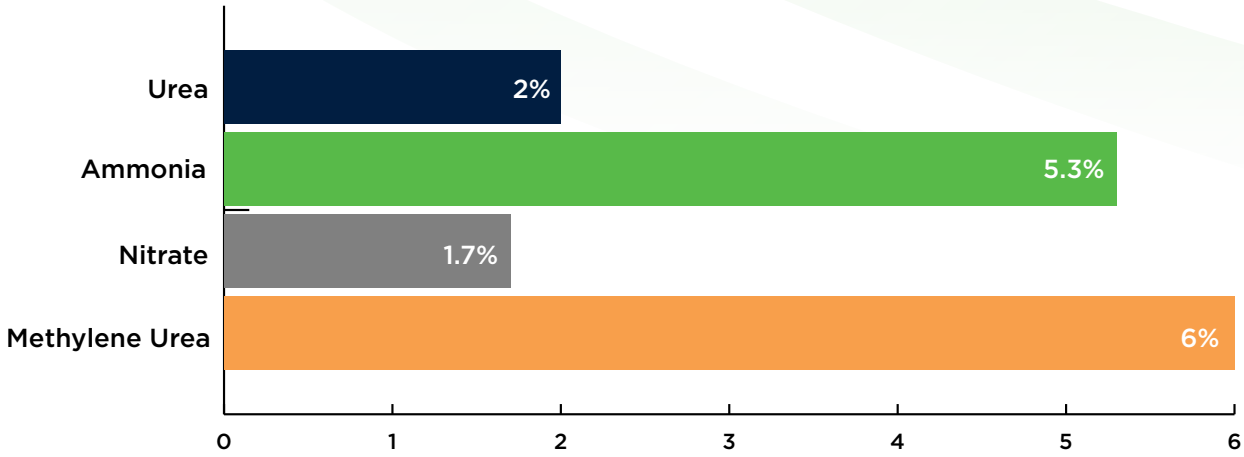
Growth Products 15.0.0 SR Mag

- Great product for slow-release Nitrogen when P and K are at sufficient levels in the soil.
- Perfect products for stadiums and training grounds to deliver both instant and slow-release nitrogen over 6-10 weeks to optimize plant health.
- 5% Magnesium gives excellent colour without excess iron applications.
- 3% Calcium to aid cell wall strength, increase root and shoot cell division and improve plant vigour and stiffness.
- Zeolite incorporated into the formulation which aids nutrient retention and availability to the plant, maximizing nutrient efficiency.



Issue	Suggested Solution
Regular feed for sand-based football pitches to maintain colour, growth and performance.	Apply Growth Products Mini 15.0.0 SR Mag at 25-45g/m² every 6-10 weeks as part of a structured nutritional programme. Consult your Regional Technical Sales Manager for a programme of Polyon base feeds, biostimulants, Sustane organic fertilisers and foliar treatments for optimum pitch performance and health.
Premium feed required for golf tees, fairways and surrounds	Apply Growth Products Mini 15.0.0 SR Mag at 35g/m² every 6-10 weeks through the growing season. Apply a monthly foliar mix of 10l/ha Xtra Iron + 1l/ha Maintain NT for the ultimate finish.
