

**Polyon controlled-release fertilisers offer the latest technology to turf professionals, with the patented polyurethane membrane offering consistent, predictable feeding for months at a time.**

**Independent research shows Polyon fertilisers maximise efficiency of nutrient use by plants, minimising waste and maximising turf performance.**

- 4-5 month longevity from controlled-release technology.
- Balanced N:K feed for use all year round.
- 2-3mm prill size gives flexibility of application rates and areas.
- 50% fast-start portion for immediate response.
- Added 3% Magnesium and 2% Iron for a superb colour response.

Product	Pack Size	Rate	Longevity	NPK at 35g/m <sup>2</sup> (kg/ha)			Accupro Setting for 35g/m <sup>2</sup>		Spread Width
				N	P	K	Single	Double	
15.0.10	25kg	25-40g/m <sup>2</sup>	4-5months	52.5	0	35	Cone 4, T½	Cone 4, 0	4.9m

- Can be applied in cold conditions ahead of plant demand – nutrient release is controlled by soil temperature.
- The exclusive, polymer membrane coats each granule to provide the ultimate in consistent, healthy growth.
- Incorporates magnesium and iron to improve photosynthesis, increase carbohydrate production, reduce stress and enhance colour
- Ultimate in controlled-release helps prevent excess growth, even after heavy rainfall.
- 50% of the nitrogen is instantly available for immediate effect
- 2-3 mm prill.

Issue	Suggested Solutions
<p><b>Turf needs a pick up in growth in summer/autumn.</b></p> <p><b>Plants looking weakened in cool soils.</b></p>	<p>Apply Polygon 15.0.10 at 35g/m<sup>2</sup> for recovery of summer damage and long term feeding. For complete plant strength and performance, consult your Regional Technical Sales Manager for a detailed programme using Sustane, Growth Products and Polygon granular and liquid plant health products.</p>
<p><b>Underlying 'base feed' on tees/approaches/fairways and sports pitches</b></p>	<p>Apply Polygon 15.0.10 at 25-40g/m<sup>2</sup> in the growing season every 10-20 weeks. Adjust application rates and timings to suit individual sites.</p>
<p><b>Golf tees, fairways and surrounds in need of early season boost combined with season-long controlled, balanced feed.</b></p>	<p>Apply Polygon 15.0.10 at 35g/m<sup>2</sup> in early spring to pick up growth and provide nutrition for recovery and growth. The controlled nutrition all summer leads to healthy, strong plants throughout the main growing season.</p>
