

Growth Products Hydro-Flo

A next-generation penetrant surfactant to efficiently move excess surface moisture down through the soil profile. Increase oxygen in the upper rootzone and firm up surfaces during periods of wet weather using Hydro-Flo's unique action.

Advanced surfactant's and penetrants reduce the surface tension of water to allow fast removal of surface water and even distribution of moisture throughout the profile.

- Promotes even distribution of soil moisture throughout the entire soil profile rather than simply removing surface water like competitor products.
- Extremely safe non-phytotoxic formulation due to its high quality molecular construction which will not damage plant cells.

Analysis	Pack Size	Rate	Water Volume
GP Hydro-Flo	10ltr	5-10ltrs/ha	500-700 ltrs/ha
