

Dispatch Sprayable

Dispatch Sprayable increases the penetration and infiltration of irrigation or rainfall, making it more readily available for plant uptake.

Because Dispatch Sprayable delivers water more efficiently into the soil, photosynthesis and other turf metabolic functions can be maintained with less water.

- Reduces water usage by 25-50% without sacrificing turf quality
- Improves irrigation efficiency by 30-50%
- Increases overall plant health for better disease tolerance

Product	Pack Size	Rate	Water Volume
Dispatch Sprayable	10ltr	1.75ltrs/ha	260-800ltrs/ha
