

# Growth Products Micro 8.0.4

The Growth Products Micro range of fertilisers are a high-quality, conventional fertiliser that utilises the latest micro granular technology.

The homogenous micro prill is quickly absorbed into the surface and breaks down significantly quicker than mini granular alternatives.

- Micro granules (0.5 – 1.5mm) break down within 2-3 days, minimising surface disruption and pick-up.
- Balanced NPK alongside seaweed, magnesium and calcium
- Seaweed acts as a soil improver, root developer and stress reducer.
- Zero phosphate formulation for where P levels are adequate.
- Instantly available nitrogen to boost plant health and prevent summer stress
- diseases.
- Suitable for both fine turf and sports pitches.
- Iron free formulation eliminates any turf blackening.

# Growth Products Micro 8.0.4

- Great product for mid-summer boost.
- All the benefits of a conventional fertilizer combined with the plant and soil health stimulation from the added granular seaweed.
- 8% Calcium to strengthen plant cell membranes, increase cell division and improve plant vigour and stiffness.
- Excellent balanced fertilizer with zero phosphate for those concerned about Poa ingressions.
- Due to the micro granule size, it can be applied down to 20g/m<sup>2</sup> without speckling – perfect for light, regular applications on top-spec sports turf.
- Zero iron formulation for soils with high iron/black layer issues.

Issue	Suggested Tank Mix (per ha)
<b>Turf in need of a pick up in summer without excessive nitrogen or phosphate addition.</b>	Apply Growth Products Micro 8.0.4 at 35g/m <sup>2</sup> . Alternatively apply 8.0.4 at 20g/m <sup>2</sup> and follow up with a second application 3-4 weeks later at 20g/m <sup>2</sup> .
<b>Establishing new turf with either seed or turf.</b>	Apply pre-seeder fertiliser such as Sustane Bolster 4.4.4 plus Mycorrhizae at planting time. After 1-3 weeks apply Growth Products 8-0-4 at 35-50g/m <sup>2</sup> to push the new growth on.
<b>Sand-based high specification sports pitches in need of regular light nutrition throughout the growing season. Zero phosphate requirement to reduce Poa ingressions.</b>	Apply Growth Products Micro 8.0.4 every 1-4 weeks at 20-35g/m <sup>2</sup> depending upon requirements. Consult your Regional Technical Sales Manager for a detailed programme of high quality nutrition and organic products to increase root growth and maximise plant health.
