

Yara Krista Mag

Yara were founded in 1905 and are established as one of the world's leading manufacturers of nitrogen-based mineral fertilisers, industrial products and specialist fertilisers.

Yara products are used in over 150 countries and offer a high-quality product at an economical cost. Yara Soluble Fertilisers offer a range of analysis to suit a wide variety of turf situations.

- 11-0-0 + 15% Mg formulation.
- Free-flowing fine crystalline powder which dissolves quickly in water without any residue.
- Suitable for fine turf, sports pitches, tees, fairways, outfields and ornamental lawns.
- Contains high magnesium levels for added colour and plant health.
- All nitrogen is in nitrate form, so instantly available to the plant.
- Great product for economical growth and colour response all year round.

Nutrient Applied for 25kg/ha

Product	Pack Size	Rate	Longevity	N	P	K	Mg
Yara Krista Mag	25kg	25-50kg/ha	2 weeks	2.75	1.25	7.5	3.75

Usage Period

SUPPLY | CONSULT | SUPPORT

- Nitrate-N provides instant response in cool conditions - ideal for winter sports pitches.
- Magnesium is the central molecule of chlorophyll - essential for photosynthesis and energy production.
- Perfect for a foliar feed where magnesium is restricted in the soil such as high potassium or low pH situations.
- Tank-mixable with PGR's, most selective weedkillers and other fertilisers.
- Free from chlorides, sodium and heavy metals.
- Easily dissolves - will not block nozzles.
- Can be applied as a foliar or soil feed.

Issue	Suggested Solutions
<p>Spoon-feeding outfield turf in summer</p>	<p>Apply Yara Krista Mag at 25-50kg/ha every 2-3 weeks depending on growth rate required. Tank mix with Maintain NT growth regulator if required. For complete plant strength and performance, consult your Regional Technical Sales Manager for a detailed programme using Sustane, Growth Products and Polyon granular and liquid plant health products.</p>
<p>High zeolite content rootzone with high potassium levels reducing magnesium availability resulting in poor colour</p>	<p>Apply Krista Mag at 25-50kg/ha when colour and growth do not sufficiently improve following a granular fertiliser. In zeolite- amended rootzones with a very high potassium content, always use low potassium granulars to reduce K levels.</p>
<p>Sports Pitches or Fairways in need of a short-term growth and colour boost</p>	<p>Apply Yara Krista Mag at 25-50kg/ha for instant results. For complete plant strength and performance, consult your Regional Technical Sales Manager for a detailed programme using Sustane, Growth Products and Polyon granular and liquid plant health products.</p>
