

Growth Products Micro 4.0.4+9%Fe

The Growth Products Micro range of fertilisers are a high-quality, conventional fertiliser that utilises the latest micro granular technology.

The homogenous micro prill is quickly absorbed into the surface and breaks down significantly quicker than mini granular alternatives.

- Micro granules (0.5 – 1.5mm) break down within 2-3 days, minimising surface disruption and pick-up.
- 9% iron for the prevention of moss in turf surfaces.
- Low nitrogen content making the product effective in cooler temperatures.
- Zero phosphate formulation for where P levels are adequate.
- 1:1 N:K ratio to match plant uptake requirements in a balanced soil.
- Suitable for both fine turf and sports pitches.
- Iron plus lower nitrogen levels can reduce incidences of disease.

Growth Products Micro 4.0.4+9%Fe

- Ideal spring starter to kick-off growth where moss is also an issue.
- Boosts potassium levels which can be important in anthracnose prevention.
- Useful to reduce moss invasion and strengthen turf prior to mechanical removal.
- Due to the micro granule size, it can be applied down to 20g/m² without speckling.
- Instant green-up from high iron content.

- **Do not allow the product to sit on hard surfaces such as paving slabs as staining may occur.**

Issue	Suggested Tank Mix (per ha)
Early spring – moss invasion in turf over the winter. Looking to deter further moss invasion and encourage grass growth.	Apply Growth Products Micro 4.0.4 at 35-45g/m ² . Allow moss to blacken and then scarify to remove. Overseed bare areas if necessary 2-3 weeks later. Consult your AGS Regional Technical Manager for advice on a healthy nutritional and agronomic programme to reduce moss and improve plant and soil health.
Moss-prone greens heading into autumn.	Apply Growth Products 4.0.4 at 35-45g/m ² . Allow moss to blacken and then scarify. The low nitrogen and 9% iron content will help to reduce disease.
