

Growth Products Micro 4.0.8

The Growth Products Micro range of fertilisers are a high-quality, conventional fertiliser that utilises the latest micro granular technology.

The homogenous micro prill is quickly absorbed into the surface and breaks down significantly quicker than mini granular alternatives.

- Micro granules (0.5 – 1.5mm) break down within 2-3 days, minimising surface disruption and pick-up.
- Low nitrogen, higher potassium formulation to reduce ‘soft’ growth.
- Added 4% iron for instant green up effect.
- Zero phosphate formulation for where P levels are adequate.
- 1:2 N:K ratio ideal for sand rootzones where K leaching is common.
- Suitable for both fine turf and sports pitches.
- Iron plus lower nitrogen levels can reduce incidences of disease.

Analysis	Pack Size	Rate	Longevity	Nutrient applied at 35g/m ²			Accupro setting for 35g/m ²	
				N	P	K	Single	Double
GP Micro 4.0.8	25kg	20-45g/m ²	4-6 weeks	14	0	28	5, N	5, K ³ / ₄

Growth Products Micro 4.0.8

- Ideal in spring to kick-off growth without causing disease-prone 'soft' growth.
- Boosts potassium levels which can be important in anthracnose prevention.
- Useful to control moss and strengthen turf prior to mechanical removal.
- High potassium to nitrogen ratio for steady growth going into the autumn.
- Due to the micro granule size, it can be applied down to 20g/m² without speckling –perfect for light, regular applications on top-spec sports turf.
- Instant green-up from high iron content.

Issue	Suggested Tank Mix (per ha)
<p>Some moss on turf, but generally good sward density. Needing to strengthen turf before renovation work.</p>	<p>Apply Growth Products Micro 4.0.8 at 35g/m². Allow moss to blacken and then scarify to remove dead moss. Consult your Regional Technical Manager for advice on a healthy nutritional and agronomic programme to reduce moss and improve plant and soil health.</p>
<p>Looking for tough growth going into the autumn and reduced disease infection.</p>	<p>Use 4.0.8 alongside Sustane and Growth Products low-salt granulars and liquids to give a balanced organic nutritional programme to reduce infection and improve plant health. The 6% iron content will reduce disease.</p>
<p>High sand sports pitches with very low potassium levels.</p>	<p>Use Sustane 4.6.4 to boost soil health and improve CEC. Apply 4.0.8 as part of a balanced programme alongside Sustane organic granulars and Growth Products low-salt liquids.</p>
